Office hours by appointment |
| COURSE OBJECTIVES | Following the completion of this course, students should be able to:  
- Define information system auditing and the role of the information system auditor  
- Explain the professional standards and best practices that should be applied to computer information systems  
- Analyze a case study to determine the problems that resulted from an oversight of professional standards or best practices  
- Demonstrate an understanding of IS security as it relates to internal and external security |
| CLASS OVERVIEW & GRADING | Since the introduction of the Sarbanes-Oxley Act of 2002, there has been an increasing focus on the strengths and weaknesses of a company's information system infrastructure. This course will introduce those students interested in auditing to the fundamentals of Information Systems (IS) auditing with an emphasis on understanding IS controls, the types of IS audits, and the concepts and techniques used in IS audits.  
5% Class Attendance and Participation  
50% Homework and Assigned Problems  
15% Quizzes (2)  
30% Tests (2) |
| REQUIRED TEXT | Title: Information Technology Auditing, includes ACL CD-ROM  
Author: James A. Hall  
Publisher: Cengage  
Edition: 3rd Edition  
ISBN: 9781439079119 |
| IMPORTANT REMINDERS | Students are expected to check the class Desire2Learn (D2L) site prior to the first night of class and on an on-going basis.  
Class attendance is crucial to the learning experience. A student is required to contact their instructor in advance if they are going to miss a class session. |
