| COURSE OBJECTIVES | • Understand the purpose and goals of information management in the health care delivery system  
• Know the role of various health care professions and how they contribute health care information  
• Describe health care regulations and methods for compliance.  
• Explain the major components of a health care record. |
| CLASS OVERVIEW & GRADING | Content:  
• Reading text, class lecture and discussion  
• Group/individual exercises  
• Weekly one-page article reviews  
• Final exam  

Grading:  
• Class preparation and participation 10%  
• Weekly exercises 30%  
• Weekly article reviews 20%  
• Final exam 40% |
| IMPORTANT REMINDERS | Remember to complete your article reviews and required reading before each class. Be prepared to host a discussion about your article with the class.  
Depending on class size, there may be group or individual exercises in class.  
Students are expected to check the class Desire2Learn (D2L) site prior to the first night of class and on an on-going basis. |
| PRE-CLASS ASSIGNMENT | Read Chapter 1 and 2. Submit one article review about the United States health care system. The article you review must have a publication date within the last year. |
