### Class Information

**Benedictine University**

**MIS 654 Enterprise-Wide Information Systems**  
Winter 2016  
Saturdays, 9:00 am – 12:00 pm  
January 16 – March 19  
Classroom: Refer to MyBenU

### Course Prerequisites

MIS 674

### Instructor Information

Mark Sowa  
Email: msowa@ben.edu; Cell: 630.927.0081  
GBA office phone: 630.829.6210  
no office location – no office hours

### Course Objectives

- What an Enterprise System is, and how is it different from other business systems.
- Business process, information, training, and technical issues raised with an ES.
- Typical steps and resources needed to deliver and support an ES.
- Although we use examples from real ES software across various industries, this course is not a step-by-step guide to implement a specific technical solution in any specific industry.

### Class Overview & Grading

**Content:**  
- Reading text, lecture, and class discussion.  
- Quizzes (2 take home) covering text and lectures.  
- Three presentations covering Systems Analysis and Integration Design: a real-life business situation requiring discovery of interrelated business requirements across multiple groups, an analysis of potential solutions, and a proposed integrated design. Three deliverables (requirements, analysis, and design) will be presented in class.

**Grading:**  
- Three presentations (19% + 18% + 18%) = 55%  
- Quizzes (20% + 20%) = 40%  
- Class preparation & participation = 5%

### Required Text

### Important Reminders

We follow the texts very closely, and many quiz questions directly reference content from both textbooks. Other quiz questions directly reference lecture material. Class size is typically small, so there are no team activities.

Students are expected to check the class Desire2Learn (D2L) site prior to the first night of class and on an on-going basis.
| **PRE-CLASS ASSIGNMENT** | None.  
Be prepared to listen, discuss, question, and contribute. |
