Study the structures of the brain and spinal cord; blood supply; meninges; and cerebrospinal fluid.

Discuss the functions of these structures and their clinical applications, such as stroke and movement disorders.

The content will be covered through lecture, readings, and lab demonstrations.

For more information contact Dr. Susan Darby at sdarby@ben.edu

*Pre-Requisites: "C" or better in CHEM 123, BIOL 203 or BIOL 258, or instructor consent
