**Vacation Preparedness**

Summertime means vacation time for many people. While you may be familiar with disasters that are common in your community, you could encounter unfamiliar hazards on vacation.

Identify the hazards for the area you plan to visit. The same response actions you use at home for a particular hazard may be challenging to implement in your vacation spot.

For example, you may have a basement at home to take safe refuge in during a severe storm but that may not be available when you are on vacation.

Know the emergency response plan for your hotel or other lodging accommodations.

A little research, planning an strategic packing could go a long way toward keeping your family safe throughout your vacation.
