**HEAT SAFETY**

Heat is the number one weather-related killer in the United States, resulting in hundreds of fatalities each year. In fact, on average, excessive heat claims more lives each year than floods, lightning, tornadoes and hurricanes combined. East of the Rockies, they tend to combine both high temperature and high humidity.

**Heat disorders:**

- **Sunburn** – Redness and pain. In severe cases swelling of skin, blister, fever and headaches.
- **Heat Cramps** – Painful spasms usually in the muscles of legs and abdomen with heavy sweating.
- **Heat Exhaustion** – Heavy sweating, weakness, cold, pale, clammy skin, thready pulse, fainting and vomiting but may have normal temperature.
- **Heat Stroke (or sunstroke)** – High body temperature (106 degrees or higher), hot dry skin, rapid and strong pulse, possible unconsciousness.

**Wonderful World of Wheels Naperville Park District Event**

Benedictine University Police were again requested to appear at the Wonderful World of Wheels event for the Naperville Park District during the month of May.

Sgt. Lloyd Popp and Community Service Officer Will Torres were at the event with the University Police Mobile Command Post, handing out Safety giveaways and other goodies to the kids and their parents.

Kids ages 1-5 were able to see, touch, and experience life-sized community vehicles, including tractors, police cars, park maintenance trucks, and many more.
